The sounds are not ditables but the ACCS is fairly easy so no worries There are no extensions and connectors is simple: audio out (output), audio in (from another instrument to mix with the expander), all in 6.

SOUNDS Sounds no longer adequate today my style of music but they allow me to use all of the same sounds of the expander for various styles, even the percussion, which are quite nice.. Tablecloths and synths are not bad, I do not like the way What are gnral sounds dance, techno, oldschool, breakbeat.. UTILIZATION Gnrale configuration is simple, if you have MIDI, a brain and fingers for the mouse, Nickel C: P! There's Effects: Reverb and Chorus, pretty standard but clean.. 150 of ocaz, you do not be evil > 1U -> 256 sounds, many of which sixty are samples of music 'dance' (good quality but frankly viellot the samples) -> Correct connectors (audio outputs, midi in out through) UTILIZATION -> Config gnrale very easy and very easy to use bte SOUNDS -> Sounds 'old school dance' -> I use it mainly for its drum kits that are relatively accurate and some original sounds OVERALL OPINION -> 5 years is that I use and frankly allows for a variety of musical spirit (techno, electro, dance): I wrote my beginners fifteen pieces, and nothing but the MDC1 an atari (half with sounds relatively INTERESTED).
